Explore Your Options

With your education and experience, you may be eligible for HCA registration

Integrate into the Canadian health care workforce more quickly as an HCA

1

If you completed HCA or health related education outside of BC, you may be eligible to complete a competency assessment to confirm that you meet BC HCA Core Competencies.

2

Another option is to complete a recognized BC HCA education program that is about seven months long. This program is a good return on investment, and many programs have flexible delivery options during weekends and evenings, and even online. To be admitted to an HCA program, you will need to demonstrate that you meet the BC HCA Program English Language Competency Requirements.

Benefits of Becoming a Health Care Assistant

Improved Employment

Access to comprehensive benefits package and salary while employed in health care

Help Your Community

Directly impact your community by providing person-centred care and assistance to others locally
